

GVB RESPONSE TO QUESTIONS AND AMENDMENT NO. 1 FOR

GVB RFP 2017-006

Data Analytics Software & Interactive Dashboard Development

March 1, 2017

1. In Section 1.0 Background and Purpose, under the “purpose” statement, the RFP states that the reports generated from the analytic software will be available via the interactive dashboard on GVB’s corporate website. The following questions relate to the dashboard:

- a. Is the corporate website for internal GVB personnel use only or is it available for the general public?

GVB Response: The corporate website is available and accessed by the general public.

- b. Approximately how many users are anticipated?

GVB Response: While the back-end is limited to GVB internal use only, the Dashboard is available online to the general public for them to set parameters that generate a report for their use based on the data GVB publishes. Data shall not be open for the general public to edit.

2. The RFP calls for “near real time” integration of data. Is it possible to clarify the expectation around “near real time”?

GVB Response: GVB anticipates for data to be loaded into the Offeror’s proposed software, then audited and cleared up before being made available online through the corporate website dashboard. GVB shall additionally have the ability to publish the data, roll back data should additional auditing be necessary, and to edit data that is published.

3. Based on the raw data file shared in Appendix B in the form of .dat files, how can we interpret the meaning of the data? Is it possible to provide a mapping document to convert the raw sample files to generate sample cross-tabular reports?

GVB Response: The data files in the form of (.dat) are the raw files generated from the Scantools scanning software. GVB currently uses IMPS to interpret and map these files (attached separately):

- IMPS Programming Language
- IMPS Data Dictionary

-
4. We are an India based data analytics and dashboard development company...can we get the required affidavits made under Indian Judicial laws?

GVB Response: See Section 1.8 of the RFP. U.S. federal and Guam local laws govern this project.

CMF

AMENDMENT NO. 1

GVB RFP 2017-006

Data Analytics Software & Interactive Dashboard Development

March 1, 2017

In light of the release of additional appendices, specifically the IMPS Programming Language and IMPS Data Dictionary, GVB hereby revises the deadline for submission as follows:

Original Deadline: 5:00 p.m. - March 13, 2017 (Monday)

NEW DEADLINE: 5:00 p.m. - March 17, 2017 (Friday)

ROSE Q. CUNLIFFE
GVB Acting President & CEO
